

Product Specification

Part No.: SCJ-3533-SMT-A

1) Rating: DC 30V 0.3A

2) Operating Temperature Range: -10° C $\sim +60^{\circ}$ C

3) Electrical Performance:

| | Test Conditions | Performance |
|-----------------------|-------------------------------------|---|
| Contact Resistance | Measured at small current (10mA | 50mΩ Max. |
| | 1000Hz or less) | |
| Insulation Resistance | Apply a voltage of 500V DC | |
| | shall be applied for 1 minute after | |
| | which measurement taken: | |
| | (1) Between terminals not to | |
| | be contact | 100MΩ Min. |
| | (2) Between body and | |
| | terminal | |
| | (3) Between terminals not to | |
| | be contact when plug is | |
| | inserted | |
| Dielectric Strength | AC500V rms (50-60Hz) for 1 | |
| | minute trip current: 0.5mA | |
| | (1) Between terminals not to | |
| | be contact. | With and damage to mente engine |
| | (2) Between body and | Without damage to parts arcing or breakdown |
| | terminal | |
| | (3) Between terminals not to | |
| | be contact when plug is | |
| | inserted. | |

4) Mechanical Performance:

| | Test Conditions | Performance |
|-------------------|---|--------------------------------------|
| Insertion Force | Measurement shall be made after 3 | |
| | times of insertion and extraction with | 800~1600gf |
| | gauge plug | |
| | Measurement shall be made after 3 | |
| Extraction Force | times of insertion and extraction with | 500~1100gf |
| | gauge plug | |
| | A static load of 300gf shall be applied | Electrical characteristics shall be |
| Terminal Strength | to the terminal for 15 seconds in any | satisfied without damage or |
| | direction | excessive looseness of terminals |
| Life Test | Endurance without load: | (1) Contact resistance: 100mΩ |
| | Jack shall be subjected to 5,000 | Max. |
| | cycles at a rate of 15 to 18 cycles per | (2) Insulation Resistance: 50MΩ Min. |
| | minute without loading. | (3) Withstand Voltage: AC 500V |

| (4) Without damage to parts arcing or breakdown. |
|--|
|--|

5) Environmental Characteristics:

| | Test Conditions | Performance |
|--------------------------------|---|--|
| Solderability Test | The top of terminals shall be | The Area of soldering should be |
| | dipped 2mm in the solder bath of | over 75% |
| | 255±5°C for 3±0.5 seconds | |
| Resistance to Solder Heat Test | Solder bath method: Solder temperature 260±5°C. Immersion time within 10 sec. Immersion depth up to the surface of the board 1.6mm. Dimensions of component holes in the printed wiring board shall being accordance with those | Without deformation of case or excessive looseness of terminals electrical characteristics shall be satisfied. |
| | specified in this specification. | |
| Cold Test | The jack shall be stored at a temperature of -25± 3°C for 48 hours, then the switch shall be maintained at standard atmospheric conditions for 1 hour after which measurement shall be made | There shall be no deformation or |
| Heat Test | The jack shall be stored at a temperature of 70±2°C for 48 hours, then the jack shall be maintained at standard atmospheric conditions for 1 hour after which measurement shall be made. | cracks in the molded part. |
| Humidity Test | The jack shall be stored at a temperature of 40±2°C and a humidity of 90% to 98% for 48 hours, then the jack shall be maintained at standard atmospheric conditions for 1 hour after which measurement shall be made. | There shall be no deformation or cracks in molded part. |
| | Test Condition (Unless otherwise specifi | ied) |
| | Temperature: 5°C - 35°C | , |
| | Humidity: 45% - 85% R.H. | |
| | Pressure: 86 – 106kPa | |
